Reasons for Allowance

1. The following is a statement of reasons for the indication of allowable subject matter: The subject matter in the independent claim could either not be found or was not suggested in the prior art of record. The subject matter not found was the flexible tubing having longitudinally extending external grooves and complementary protrusions such that the grooves and the protrusions releasably hold the tube in parallel courses. These features in combination with the other elements in the claim render the claims allowable.

2. The closest references available at this time are Scott et al (US 5316246) and Gambale (US 5372592) both disclosing flexible tubing that is secured in parallel courses. However, these devices do not disclose the protrusions and grooves of the present application.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
